

PLATINUM 4 WIRE VIDEO INTERCOM SYSTEM

Modern Convenience,
Robust Security

Platinum offers a full range of Video Intercom Systems to suit your lifestyle

OVERVIEW

The Platinum Video Intercom is designed to fit in with modern designed properties with the reliability to last for many years. It allows you the ability to see and talk to whoever is at the door without having to take the risk of opening the door to a stranger.

Easy to identify and use backlit touch buttons on the ultra slim 18mm monitor, makes it simple to operate allowing identification and communication with visitors at locked doors. The electric lock/latch can be operated from the Platinum Monitor allowing you to release the lock easily from any monitor throughout the house providing you with that extra level of security. Up to 3 monitors can be installed with this system which can also be used as an audio intercom between stations so you easily contact somebody in another part of the house. The outdoor front door station is made from a vandal proof
